

## Chance Capital

We help Dutch businesses set up and scale in to the UK

---

### About us

Chance Capital is UK based corporate advisory firm, with a five year history in helping early growth stage businesses with business strategy and capital raising requirements. To date, Chance Capital has raised over £100m for post seed, pre IPO businesses based in the UK and across Europe. We have strong relationships with over 150 professional investors who are looking to make strategic investments, targeting growing businesses with exciting potential.

### What we offer

With Brexit now behind us and the UK-Dutch connections gaining greater significance, Chance Capital is branching out in Holland to broaden the scope of our service offering. Our core focus is to support Dutch SME businesses that are looking to scale in to the UK market, advising and supporting them on the implementation of all necessary set up requirements. This may well include advice and assistance around tax, legal and personnel requirements in the UK. As part of this process (and if there is a requirement to do so), we are also well positioned to assist on fund raising for that company as they scale in to the UK.

Chance Capital has partnered up with Ince Global, who offer a myriad of services for Dutch companies setting up in the UK. These include the full range of intellectual property rights and brand management both within contentious and non-contentious matters. This can range from copyrights to trade marks, patents, design rights and domain name rights. We advise on the best way to develop and protect your IP and technological innovations.

"We are able to offer Dutch businesses a full suite of services, shepherding them through the often daunting process of setting up and raising capital in a new jurisdiction."

Our most common requests for support in this regard tend to focus on (but are not limited to) the following areas:

- Private Limited Company setup;
- Legal Assistance (shareholder agreements, advice on SPV structuring);
- Tax advice on company formation and revenue generation, and HMRC registration;
- Business insurance;
- Licensing advice/support;
- Intellectual property services;
- Employment law/advice;
- SEIS/EIS tax relief application;
- UK banking advice/support (including Foreign Exchange support if necessary);
- Personnel Support; and
- Language Services.

## Insurance

We can advise you on all types of life cover whatever your circumstances. For some clients that could mean covering an outstanding mortgage, for others it could be to ensure provisions are in place to look after their dependants or business partners. We advise on a range of issues, ranging from the basic to the highly complex. We know most schemes are keen to minimise liabilities and have a clear oversight of risk. An example of the products we advise on:

### Key Man Insurance

Insurance is a fundamental component in establishing and running your business. Most business owners are likely to arrange insurance cover on their buildings, cars and equipment and are covered for 'loss of profits' in the event of a catastrophe such as a fire or flood. However, many businesses do not insure their greatest asset – the key people who 'make their business happen'.
